

încubic®

2-way Humidity Controller

Incubic® 2-way humidity controller is a groundbreaking innovation designed to maintain a precise and stable relative humidity (RH) level in a closed environment. This product can both release moisture and absorb excess moisture as needed, depending on the surrounding humidity conditions. Incubic® 2-way humidity controller are available in specific RH levels from 30% to 90%, allowing users to choose the ideal humidity level for their specific needs.

Specifications	Humidity range
